ABDINASIR OSMAN IBRAHIM

Software Developer | AI Chatbot Specialist

Nairobi, Kenya | 0722242664 | aj07256768@gmail.com
linkedin.com/in/abdinasir-osman-dev | github.com/aj-devworks

PROFESSIONAL PROFILE

Software developer with hands-on, project-based experience across the full stack (JavaScript, React, Python Flask, PostgreSQL) and applied experience building AI-powered chat experiences with the Claude API. Trained through an intensive software development bootcamp with a strong grasp of frontend and backend fundamentals, role-based access systems, and secure API design. Currently building a portfolio of production-style projects with the goal of securing an international software development role.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, React, Python, Flask, HTML/CSS
Databases: PostgreSQL
AI & Chatbot Development: Claude API integration, conversational app design, prompt engineering
Authentication & Security: JWT authentication, role-based access control (RBAC)
Tools & Deployment: Git/GitHub, Vercel, REST APIs

PROJECTS

Jiseeti — Civic Reporting Application | Team Project *2026*

- Led a team of 4 developers to build and deploy Jiseeti, a civic reporting app that generated 20+ user reports and was used by 100+ users, by architecting a custom Flask backend.
- Directed the project from initial concept through to deployment, coordinating development across the team.
- Designed and implemented a custom Flask backend to support civic issue submission and reporting at scale.

Azam Homes — Real Estate Listings Platform | Personal Project *2026*

azam-homes.vercel.app

- Built a full-stack real estate listings and sales platform with a React frontend and a secured Python Flask backend.
- Designed role-based access control for Manager and Admin users, including manager-only signup for security, with a listing workflow of pending review, admin approval/rejection, and public feed publishing.
- Implemented JWT-based authentication and structured backend with PostgreSQL for persistent, secure data storage.
- Developed key frontend features including authentication context, listings context, protected routes, listing feeds, listing detail pages, messaging, and user profiles.

EDUCATION & TRAINING

Software Development Bootcamp | Moringa School *Feb 2023 - Sep 2026*

- Intensive, project-based training covering JavaScript, React, Python, Flask, and PostgreSQL.

Kenya Certificate of Secondary Education (KCSE) | Mandera Secondary School *2024*

- Grade attained: B-

Kenya Certificate of Primary Education (KCPE) | Daua Primary School *2021*
